

Genesis HealthCare - Millville Center

Looking for a Remarkable Career?

Then consider, Genesis Health Care, one of the nation's largest providers of skilled nursing and rehabilitation therapy. We operate over 200 facilities in 13 eastern states providing outstanding care, and provide services in nearly 750 more throughout the eastern part of the nation, delivered by highly skilled practitioners in a warm, inviting setting.

The company mission statement is to improve the lives we touch through the delivery of high quality health care and everyday compassion. An example of our compassion is exemplified at Genesis HealthCare's Millville Center, a 160+-bed facility in Millville, NJ; midway between Philadelphia and Atlantic City. In conjunction with Riverfront Renaissance Center for Arts, a Millville, NJ non-profit organization promoting the arts as a catalyst for economic/cultural revitalization; residents participate in the arts through the Center's Arts Creates Excellence (ACE) program.

Funded by grants from corporations and foundations, ACE allows teachers from the Riverfront Renaissance Center to visit Genesis HealthCare's Millville Center one day/week for 5-6 weeks and give art lessons in pastel and watercolor painting. Assisting the teachers are employees of Millville Center's recreation therapy department. Resident art work was displayed at Riverfront Renaissance Center during the month of May, in celebration of Senior Citizens Month.

The art program has been beneficial to residents in many ways. They are invigorated to be learning and as a result have a heightened alertness and concentration. Increased socialization through interaction with fellow residents and teachers has been another outcome of the program. Residents get to nourish their creative side while at the same time a sense of accomplishment and pride is felt upon completion of an art project.

The art program is one way employees are dedicated to resident satisfaction. The satisfaction that our employees bring to our patients and in turn the patients to our staff is the main reason many employees find working at Genesis HealthCare so rewarding.

If making a difference in people's lives isn't a compelling enough reason to work at Genesis HealthCare, there are many others. One is that our 38,000+ work force is afforded many career choices in a variety of disciplines, not restricted to nursing. Employment is available in food service, recreation therapy, environmental services, business office operations, marketing and social work. Genesis Rehabilitation Services, Respiratory Health Services and Genesis Physician Services, inde-

pendent divisions of the company, also provide career options for positions such as Respiratory Therapists, Physical/Occupational/Speech Therapists and Medical Directors.

Another reason to join Genesis HealthCare is the ability to leverage your skills in different ways through lateral job changes and/or to advance through Leadership Development Programs (LDP) and/or through our Tuition Assistance Program (TAP). Because Genesis HealthCare is committed to making learning accessible to all employees, the company pays tuition costs prior to the start of coursework. Through LDP, employees who have the motivation and aptitude to become Nursing Home Administrators or Directors of Nursing are partnered with a Genesis certified instructor and a mentor. Mentorship continues for years after the LDP graduate assumes a leadership role to insure success.

Genesis HealthCare knows that investing in employees makes a stronger company, whether it is enhancing clinical skills, development of leadership capabilities, or providing strong foundations for career development.
