Center has an Admissions Quarentine Unit (AQU or yellow) for anyone who newly admits or readmits from the hospital. The AQU can also have, but not required, patients who frequently go out for appointments (i.e. dialysis, chemo, etc..). Patients will be tested twice on the AQU to confirm negative status and after 14 days of being asymptomatic and negative testing, resident will be moved to our green units. If we receive positive result resident will be isolated according to HAN-509 along with roommate if applicable. Room changes must be made urgently, as soon as discordant COVID status between roommates is recognized.. Center leaders should be prepared to effect room changes on any shift. Staff on all shifts must understand and be able to apply and explain the cohorting decisions. Residents who are confirmed positive can share a room with a confirmed positive on another unit. Residents who test negative can share a room with other recently tested negatives on the same or another unit. Facility will use admission quarantine unit, referenced above, to address the possible exposure risk from new admissions and readmissions. Additionally, anyone going out on frequent medically necessary appointments (i.e. dialysis, chemo, etc..) will be put on patient specific precautions requiring staff to remove gowns in between patients.

SCREENING PROTOCOLS
